ABSTRACT

This Research aims at analyzing the relation of working industry practice achievement and learning study entrepreneurship achievement with student's entrepreneur interest of XII class majoring in automotive at SMK Perindustrian Yogyakarta 2010/2011.

The type of the research is *ex-post facto*. Population of this research was 62 students of XII class SMK Perindustrian Yogyakarta. In this research, the member of the population was less than 100, so all of the member of the population are identified. Because of it, this research included into the population research. The data collection method was using the documentation method and questionnaire method with likert scale. In this research, content of instrument validity are consulted with the expert (Expert Judgement) and construct validity was using product moment rule from Pearson, while instrument reliability is use Alpha Cronbach. The examine prerequisite in this research was using normality examine and linierity examine. Data analysis technique was using descriptive statistic analysis to counting price of mean, median, modus and deviation standart. The analysis of the research was using double correlation analysis with product moment correlation to examine hypotesis.

The result of this research show: (1) there are positive relation between working industry practice achievement with student's entrepreneur interest of XII class majoring in automotive at SMK Perindustrian Yogyakarta shown by $r_{x1,y}$ 0,379; (2) there are positive relation between learning study entrepreneurship achievement student's entrepreneur interest of XII class majoring in automotive at SMK Perindustrian Yogyakarta shown by $r_{x2,y}$ 0,382; (3) there are positive relation between working industry practice achievement and learning study entrepreneurship achievement together with student's entrepreneur interest of XII class majoring in automotive at SMK Perindustrian Yogyakarta shown by correlation coefisien ($R_{y, x1,x2}$) as large 0,520. Based on corelation coefisien table, number of corelation coefisien as large 0,520 including to the medium corelation category, so there is a medium relation between working industry practice achievement and learning study entrepreneurship achievement with entrepreneurship interest.
